SCOoffice Server™ Release 4.1

E-mail and Collaboration for SCO® UNIX® Servers

April 2004: The SCO Group announces availability of the SCOoffice Server 4.1, e-mail and collaboration for SCO UNIX servers. This new release of SCOoffice Server delivers the reliable, full-featured e-mail and collaboration solution to the popular SCO OpenServer™ platform. SCOoffice Server both prevents e-mail viruses from reaching users and filters out junk e-mail.

1 Description

SCOoffice Server 4.1 delivers a reliable, full-featured Internet e-mail and collaboration solution for SCO UNIX servers. Designed with comprehensive security features, SCOoffice prevents e-mail viruses from reaching users, filters out junk e-mail, and secures e-mail access. Providing more than just e-mail services, SCOoffice also delivers a real-time collaboration solution for scheduling group meetings, sharing contact lists and address books, and managing group to-do lists and tasks. For convenience, SCOoffice integrates with Microsoft® Outlook® and industry-standard Web browsers. Empowering non-technical users such as office managers, secretaries, and assistants, SCOoffice features a friendly interface for setting user and environment preferences.

2 Product Features

New Features for Release 4.1

New Features	Benefits
New Platform Support	Supports SCO OpenServer 5.0.7
Microsoft Outlook Integration	<ul style="list-style-type: none"><input type="checkbox"/> Downloads and configures SCOoffice Connector™ for Microsoft Outlook for accessing SCOoffice Server 4.1 with a single click<input type="checkbox"/> Delivers performance increases with real-time IMAP folder updates<input type="checkbox"/> Improves mobile user experience with offline message synchronization<input type="checkbox"/> Provides greater than 2 GB offline storage space
Web-based Collaboration Suite	<ul style="list-style-type: none"><input type="checkbox"/> Collaborates between Microsoft Outlook and Web browsers such as Internet Explorer, Netscape® and Mozilla™.<input type="checkbox"/> Sends and receives email messages<input type="checkbox"/> Shares folders, calendars, task lists, address books<input type="checkbox"/> Schedules meetings and allocates resources<input type="checkbox"/> Displays familiar Outlook user interface

3 Licensing

SCO requires an e-mail user license for each user of SCOoffice Server. The base license includes 5 e-mail user licenses and is required before user bump packs can be applied. A low-cost media kit is available separately. The media kit includes a 60-day evaluation license. Partners may obtain a not-for-resale (NFR) license to demo SCOoffice Server for extended periods.

Media is also available for download from <http://www.sco.com/download/> at no charge. For convenience, the SCO OpenServer 5.0.7 media kit now includes the SCOoffice Server media.

Each e-mail user can have an unlimited number of aliases. There is no restriction for concurrent use. For additional e-mail user licenses, SCO provides "bump packs" in 10, 25, 50, 75, 100, 250, 500, and 1000 e-mail account increments.

When the number of e-mail accounts has been reached, SCOoffice will prevent new accounts until the administrator purchases additional licenses.

Licenses for the new version of the SCOoffice Mail Connector for Microsoft Outlook and the new SCOoffice WebClient are included in the base license and user bump pack pricing.

SCOoffice Server is now available for SCO OpenServer 5.0.7. A release of SCOoffice Server 4.1 for UnixWare® 7.1.4 is planned for June, 2004.

4 Availability

The SCO Group is now accepting orders for the SCOoffice Server 4.1. First customer shipments are anticipated to begin in the Americas on May 3rd, 2003, with worldwide availability on May 10th, 2003.

8 Services

Technical Support

SCO's award-winning Global Services offer a complete portfolio of worldwide support services on SCO's full range of software products, giving customers powerful choices to choose from based on their business requirements for SCO products. Local language support is one of the many key attributes to SCO Global Services.

Business-critical services (unlimited technical support incidents covering unlimited licenses/installations) – 24x7 Emergency Service and retired operating system product support available as add-ons to base contract.

SCO Enterprise, the highest level of support, includes a dedicated technical account manager assigned exclusively to your account. A dedicated account manager provides one point of contact for all of your technical issues with immediate response time, around the clock coverage, as well as 24x7 engineering escalation assistance on all Severity 1 issues. SCO Enterprise is a customized contract for each customer based on your business demands.

SCO TEAM Support is designed for a wide range of corporate customers requiring high-level, proactive technical support for business critical operations. With TEAM, you have immediate and direct access to your assigned senior technical account manager, responsible for assuring successful solution implementation and support for your SCO systems. In addition, an onsite visit is included with the service, which ensures your Technical Account Manager is familiar with your environment. 24x7 after-hours support is available as an add-on to your base TEAM support agreement.

SCO SoftTech Plus includes support for unlimited licenses and installations covering all SCO products, with a guaranteed one-hour response time. This service is targeted to SCO partners and customers that need coverage for all SCO products. With SoftTech Plus, you also have an assigned administrative account manager as your primary contact for administrative issues.

SCO SoftTech includes support for unlimited licenses and installations with a guaranteed up to two-hour response time. SoftTech is available per operating system/product, allowing you the flexibility to add on additional products and services when you need them. Your administrative account manager provides a single point of contact for your administrative issues.

In addition, SCO offers traditional incident based support services with SCO's Premier incident packs

For more information on support services, visit <http://www.sco.com/support> or contact your local SCO sales representative.

Professional Services

SCO's Professional Services offer a full suite of consulting services ranging from server deployment and management, migration services to customized solutions. Professional Services can provide customization services to help customers build custom messaging or collaboration solutions using the SCOoffice Server as the starting point. For more information on Professional Services, visit <http://www.sco.com/consulting>, or contact your local SCO sales representative.

Education

SCO Education offers choices for your education needs. Whether you require classroom instruction or access to online learning, SCO Education provides UNIX training solutions to fit your requirements. SCO OpenServer curriculum has been completely updated, and is now available to anyone to purchase. For more information on Education, visit <http://www.sco.com/education>, or contact your local SCO sales representative.

9 Media Kit

Software licenses and media are sold separately. SCOoffice Server 4.1 is available on a single CD, which is sold separately. Included with the media kit is a 60-day evaluation license. Resellers and end-users are authorized to copy this media kit for use with valid SCO software licenses. Media is also available for download from <http://www.sco.com/download/>.
